

ANALYST / CONSULTANT, ENERGY & INFRA

Who Are We?

Spring Advisor stands at the forefront of management consulting and financial advisory, dedicated to offering pragmatic and actionable solutions to a wide array of business challenges. Founded on the principle that rigidity and formalism don't foster excellence, we've cultivated an environment that balances high-quality consulting services with a supportive and relaxed atmosphere.

Role Description

Spring Advisor is looking for a full-time Analyst/Consultant to join our Energy & Infrastructure team in our office in Helsinki, on Pohjoisesplanadi. The team is responsible for advising leading energy and infra sector clients, ranging from local energy companies to international energy & infra investors, with their most important strategic, operative and financial decisions. The role provides an exceptional opportunity to experience and make an impact in the transforming energy and infrastructure sector.

The role has a comprehensive nature as the Energy & Infrastructure team delivers both strategy and operations as well as corporate finance projects within its focus industries. In strategy consulting, you'll help clients refine their strategic direction and implement effective solutions. Your tasks may include solving complex business problems using quantitative and qualitative techniques, performing market and financial analyses, developing strategic recommendations, creating project deliverables, and presenting findings to clients. Additionally, you'll have the opportunity to work on performance and transformation projects, helping clients accelerate growth and improve profitability. In corporate finance engagements, you'll be involved in both sell-side and buy-side M&A advisory, with responsibilities such as preparing pitch decks, financial models, valuations, and analyses, among other similar tasks. You'll have the opportunity to specialize in one of these areas if you prefer, allowing you to deepen your expertise and build a focused career path within your area of interest.

Key Responsibilities

- Conduct numerical and qualitative analyses as well as synthesize recommendations
- Create financial models and company valuations
- Develop and implement solutions in close collaboration with clients
- Prepare deliverables and present findings to clients
- Participate in and drive internal development initiatives within Spring

Qualifications

- Strong analytical skills with a structured and pragmatic problem-solving approach
- Interest in strategy and M&A projects within the energy and infrastructure sectors
- Master's degree in a relevant field
- 1-3 years of experience in consulting, corporate finance, private equity, or industry expertise in energy and/or infrastructure sectors
- Excellent communication skills (in Finnish and English) and the ability to engage credibly with all organizational levels
- Proactive, self-driven, and a collaborative team player

Why Join Us?

- Work in a dynamic, high-performance consulting environment with leading clients, driving real impact on complex business challenges
- Be part of a highly motivated, close-knit team that thrives on collaboration and support
- Enjoy competitive compensation and benefits in a flexible work environment
- Experience rapid skill development and exciting professional growth with clear career advancement opportunities

If you're a proactive and analytical problem solver with a passion for driving business change, we invite you to apply and become part of our growing team at Spring Advisor!
